CHARACTER AS UNIQUE AS YOU

multiple beds / multiple baths / up to 2,356 SF

The Cimarron by Cavco Austin (often featured through Palm Harbor Homes) is a modern home, designed and manufactured to blend luxury with high-capacity family living. Spanning approximately 1,600 to over 2,300 square feet, this versatile model offers floor plans ranging from 3 to 5 bedrooms and 2 to 4 bathrooms, making it an ideal choice for multi-generational families or those needing extra space such as a home office or an additional bathroom.

The interior is defined by premium, quality finishes, including 100% tape-and-textured walls and elegant coffered ceilings with integrated LED lighting. The heart of the home is a chef-inspired kitchen featuring a massive island with deep drawers, a hidden walk-in pantry, with specialty storage. A specialized barista coffee bar equipped with a mini sink and cup washer to make mornings or evenings simple. Additional high-end touches include the spa like comfort of a 72-inch open-face ceramic tile shower in the master retreat, a spacious laundry room with a folding table, and utility bench. And finally opening the door to the versatility of year-round remote-controlled exterior LED accent lighting.
